

HX-5 SERIES COMPACT ARRAY SPEAKER SYSTEM

New innovations in sound reinforcement.

HX Series — Full area coverage

TOA's new HX-5 Series Speaker System fills an important need for versatile public address equipment that can provide high quality reinforcement for a wide range of venues. Available in black and white finishes to complement a venue's interior color scheme, the HX-5 Series is ideal for a wide range of medium size

venues of all different shapes that often pose problems for sound reinforcement. These include auditoriums, places of worship, banquet halls, community centres as well as dance halls, sports bars, shopping malls, boardrooms, gyms, health clubs and many others.

Design background

The HX-5 is an innovative modular speaker design that incorporates the best characteristics of the traditional, cumbersome woofer enclosure combined with a CD horn-loaded high frequency driver and the full-range compact speaker enclosure without the drawbacks associated with each type.

The traditional speaker system was able to provide well-controlled sound coverage but posed various difficulties for correct installation and also presented an old-fashioned appearance as well that impacts on the venue's appearance. The full-range compact speaker enclosure is easy to install, but the design's sound coverage is hard to control.

The HX-5 features remarkably easy to control coverage characteristics including problematic low frequencies and can be installed in a multitude of ways while maintaining a modern, unobtrusive appearance.
